WHY SM BIO

Four Reasons Clients Choose Us

01

In-House Integrated Production

Raw material intake, blending, forming and shipment are managed directly at our Eumseong plant — protecting both quality and delivery schedules.

02

Processed Food Know-How

Formulation experience built on seasoning and processed food blending, applied to snack and health food production.

03

Flexible from Small Batches

New brands and trial volumes are produced to exactly the same quality standard, so you can start without a heavy commitment.

04

Raw Material Sourcing Network

We work with verified suppliers in Korea and abroad to source the grains, ingredients and functional actives your product needs.

OUR MAIN LINE

Puffed Grain Snacks & Confectionery

SNACK FORMING ROOM

A production line built around grain puffing

Four machines are dedicated to this line — a snack puffing machine, dryer, combination weigher and metal detector — so grain snacks run from puffing through to inspected, weighed packs without leaving the room.

Puffed Snacks

Whole-grain puffed snacks in various shapes and seasonings

Cereal

Puffed grain cereal for breakfast and snacking

Grain & Nut Bars

Nutrition bars with grains and nuts

Dried Fruit & Veg

Jeonggwa — dried fruit and vegetable confectionery

ONE-STOP SYSTEM

From Concept to Delivery

01

Consultation

Concept, target market and preferred format. Remote meetings available; we reply within 1–2 business days.

02

Sourcing & Sampling

Grain and ingredient sourcing, recipe design, then prototype production for your review.

03

Production & QC

Mass production with quality inspection at every stage of the process.

04

Delivery & Reorder

Final inspection before shipment, and a fast route back into production for reorders.

FACILITIES

20 Machines Across 7 Dedicated Rooms

Puffing, mixing, tableting and packaging all run on our own equipment, with a separate room assigned to each process. The snack forming room is highlighted.

QUALITY

Quality Control at Every Stage

Incoming, in-process and finished-product inspection, backed by traceability records, keep our output consistent batch after batch.

01

Incoming Material Inspection

Specification and condition checks on every incoming raw material.

02

In-Process Quality Control

Quality monitoring at each stage of production.

03

Finished Product Inspection

Final quality verification and metal detection before shipment.

04

Traceability Management

Records traced from raw material through to finished goods.
